Response Time Priority Comments This board's URL is: I will need to add that in order for the system to recognize the space. Paper documents are increasingly being replaced with digital versions to save paper and energy. The amount of information generated by businesses, organizations and individuals is staggering. Businesses and individuals generate and generate in vast amounts of information every day. One approach to improve efficiency and reduce costs in producing, receiving and storing documents is the use of templates. Templates have been used for centuries. Templates can be as simple as a form template with blank fields for a customer to fill in for accounting purposes or as complex as a web-based website with multiple interactive components for a business. Templates are essential in many industries. However, templates have several drawbacks. Templates are static documents that are typically fixed in size. For instance, if a single template is used for a document that has to be printed on a wide format printer, then some of the data in the document may be lost or trimmed off. Also, if the template is used to print onto a wide format paper, the size of the template may have to be fixed to a size that does not fit the form of the document, such as a business card or a short letter. Several technologies have been developed to overcome some of the problems associated with using templates. Dynamic Web Templates are web-based documents that are created with a web browser. Dynamic Web Templates can be used for any document, but are typically used for forms. Dynamic Web Templates also allow a user to customize the template with fields and data that can be added or edited at any time, without reloading the page. A disadvantage with the use of dynamic Web Templates is that the user is required to have a web browser on their computer. Also, if the user's computer has no web browser or if the user is offline or on a mobile device that does not have a web browser, then the user cannot access the Web Template. Another technology is Microsoft Office Templates. Microsoft Office Templates are documents that are based on an existing template. Users can edit the template by making changes to the document in the document editor. These changes can then be stored in the template for the next time the user needs to use the template. A disadvantage with Microsoft Office Templates is that the user needs to 82157476af
